The Complete Unique Collection from

THE TORCH MASTER

ADVANCED BURNING CONTROL

Sensational "bonfire"-flame with minimal smoke/soot

With the "ABC"-technology the oil gasses are burned which allows a very clean and minimum smoking torch without the hazard of flying embers and sparks. This advanced technology also makes the torches extremely wind resistant.

Unique for ALL Pipe-Line torches:

- DURABLE FIBREGLASS WICK
- WIND RESISTANT
- SNUFFER WITH HOLDER

UNIQUE NO-TOUCH REFILLING

Allows you to refill directly without detaching the lamp

With the patented No-Touch Refilling system you can avoid touching or opening the torch when refilling because of the build-in funnel system. Thus there is no risk of dirt and oil on clothing and hands!

With this unique **patented** No-Touch Refilling system Pipe-Line Denmark is **the first torch maker in the world** who offers you torches that you can fill directly without detaching the lamp.

See movie clip about the "ABC"-technology on www.pipe-line.dk

CYLINDER

Cylinder Torch: Burn time 12 hours - 137 cm/55 inches
 Cylinder Lamp: Burn time 20 hours - 19 cm/8 inches

PIPE ONE + PIPE TWO

Pipe One: Burn time 6 hours - 137 cm/55 inches
 Pipe Two: Burn time 10 hours - 157 cm/63 inches

Wind resistant

Due to the unique burn technology and the durable fibreglass wicks Pipe-Line torches and lamps are extremely weather resistant and will burn even in a very strong wind.

CONCRETE BASE

Base - 6 kg/15 lbs - (117500)

See movie clip about
the Concrete Base on
www.pipe-line.dk

117500

LAMP OIL

1 litre - (110000)

Only use pure N-paraffin lamp oil
or Citronella Oil in all Pipe-Line
torches and lamps.

110000

The included rubber O-ring ensures that the torch always stands straight and stable in the base and the ring makes disassembling of the torch and base very easy even after the materials have changed in size due to weather conditions.
The rubber O-ring also ensures that torch and base can be moved around as one unit.

GROUND SPIKE

(118000)

See movie clip about
the Ground Spike on
www.pipe-line.dk

118000

Press hard so that the rubber ring rolls into the Ground Spike
